Boya

Shade finishings

Boya comes in 3 diverse shade finishings

Boya

reddot winner 2021

EN Boya is a decorative pendant luminaire. It can be used as a single element or, when hung in a cluster, it can create an interesting constellation. It is a combination of handicraft and state-of-the-art technologies. The lamp shade is made in the traditional blown-glass technology. The suspended system is designed to give you the freedom to compose it in dynamic arrangements, while the nonchalant cabling adds to its character. The color of the glass and the cable wrap can be customized.

Boya was awarded the prestigious Red Dot Award 2021.

DE Boya ist eine dekorative Hängelampe. Sie kann einzeln oder als interessantes Ensemble in mehrfacher Ausführung verwendet werden. Eine Kombination von Handwerk und modernster Technologie. Der Lampenschirm wird in traditioneller Technik aus geblasenem Glas hergestellt. Das Hängesystem ist so konzipiert, dass es die Möglichkeit bietet, die Lampe in dynamischen Arrangements zu komponieren, und die nonchalante Verkabelung trägt zu ihrem Charakter bei. Bei dieser Lampe können die Glasfarbe und das Kabelgeflecht farblich personalisiert werden.

Die Boya-Lampe erhielt die prestigeträchtige Red Dot Award 2021.

Guidelines for cleaning and maintenance of materials used in flexxica luminaires.

To maintain the beautiful color and appearance of flexxica lighting fittings, we recommend gentle vacuuming with a soft tip, preferably weekly.

Stain removal – the golden rule

Remove the stain as soon as possible. Most stains can be removed with lukewarm water, possibly with the addition of a neutral detergent.

Merino wool felt

Wool is antistatic and does not attract dirt like other fabrics. Wool is also water-repellent, so the liquids slowly penetrate the fabric.
Cleaning: First, soak up as much liquid as possible with a white kitchen towel or cloth. If the stain has dried, remove as much as possible with a vacuum cleaner. Wipe carefully with a clean white cloth.

Upholstered material

Upholstery in flexxica luminaires is highly versatile and durable. The material is antistatic and fireproof, so stains are easily removed.
Cleaning: Do not wet the entire lampshade. Always use a clean white cotton cloth and only use small amounts of cleaning agent at a time.

EcoPET material

The ecoPET is made of 60% recycled PET bottles. It is straightforward to maintain, and stains can be removed easily and hassle-free.
Cleaning: Never rub hard to remove a stain. Always use a clean white cotton cloth with a bit of detergent.

Glass luminaires

Boya is made in a traditional blown-glass technology, therefore it requires special and delicate cleaning care.
Cleaning: Use a soft, lint-free microfiber or cotton cloth with distilled water (optimal) or mild glass cleaner or a solution of equal parts water and white vinegar. Wipe carefully with a clean white cloth.

WARNING!

Benzene, acetone, and similar solvent-based products may discolor the materials of the flexxica luminaires. Before use, apply a small amount of the product to an inconspicuous spot to ensure it doesn't cause any damage or discoloration.

Flexxica reserves the right to make modifications and improvements of a technical or aesthetic nature to the products at any time without notice. The reproduction (even partial) of this catalog, for any reason and with any means, is prohibited without the prior written permission of flexxica.

Please note that the actual appearance of flexxica’s felt and fabric lighting fixtures may vary from the images shown in the catalog. This is because each type of felt and fabric possesses its own distinct characteristics. This is not a disadvantage of the luminaire but an advantage – each product is unique and unrepeatable.

Keep in mind that the colors of PET, felts, and fabric may differ slightly from what you see in the catalog. For the most accurate representation, we recommend referring to our sample book.

Due to the production process of both felt and PET, there may be slight variations in material between different production batches. Additionally, please take into consideration that PET boards have distinct left and right sides, along with a specific fiber arrangement. This is particularly important to consider when installing larger structures, such as wall-mounted panels.
