HAY

J-Series

Designed to recreate the classic FDB furniture series, the J-Series offers a functional design born out of industrial development. Under Børge Mogensen's leadership, FDB revolutionised the furniture industry with its strong concept that was not focused on detailing, but on making well-designed furniture accessible to the general population. In line with HAY's core values of creating functional, affordable furniture for the masses, HAY continues to produce the iconic series in solid, long-lasting wood, now updated in contemporary colours and finishes that add versatility to the chairs' timeless aesthetics.
