

Polypropylene

We use polypropylene, a strong and highly durable material, for several designs in our furniture collection. We use a combination of recycled polypropylene, recyclable virgin polypropylene as well as a mix of the two. The material offers high resistance and durability, which ensures a long product lifetime.

Environmental profile:

Polypropylene consumes low energy during production.

It produces low carbon dioxide emissions when compared to other polymers.

It can be recycled several times and be used in many different applications.

Recycling or reclamation of the PP and other polymers should always be encouraged when possible. Our chairs are clearly marked with the material and recycling symbol.
